Top Skills

Agentic AI Development
Fine-Tuning & Evaluating LLMs
Generative AI Workflow Design

Certifications

AI Prompting Strategist
Identity Leadership IDL201

Doris Agusiobo-Echianu

AI/ML Engineer | LLM Engineer | Prompt Engineering | GenAI Consultant | AWS Bedrock | AWS SageMaker | 5+ Years in Scalable Cloud Solutions
Catonsville, Maryland, United States

Summary

Generative AI Engineer with 5+ years of experience in software development, cloud architecture, and applied artificial intelligence. Currently pursuing a Master's in AI/ML Engineering at Colorado State University, with a focus on agentic systems, LLM orchestration, and scalable AI infrastructure.

Proven ability to design, build, and deploy intelligent applications that automate complex workflows using modern frameworks like LangChain, CrewAI, and OpenAI APIs. Adept at integrating generative AI into SaaS platforms, optimizing performance across distributed systems, and collaborating cross-functionally in fast-paced environments. Passionate about building reliable, production-grade AI systems that deliver measurable impact.

Experience

CapacityBay inc
7 years 4 months

AI Engineer
June 2023 - Present (3 years 3 months)
United States

- Designed and deployed agentic AI systems for internal automation and client-facing platforms, including multi-agent flows for document parsing, summarization, and content validation

- Integrated LLM-powered features into SaaS tools, enabling dynamic content generation, semantic search, and intelligent reporting

- Migrated legacy systems to AWS, implementing scalable microservices and AI-enhanced monitoring pipelines

- Benchmarked LLMs for performance, cost-efficiency, and applicability across marketing and operations workflows

- Led cross-functional collaboration with product and engineering teams to rapidly iterate on agent capabilities and refine architectural decisions

- Delivered custom AI solutions for startups, including GPT-powered assistants, auto-tagging systems, and intelligent email generators

- Built Python-based frameworks for chaining LLM tasks with memory, feedback loops, and autonomous decision-making

- Consulted on AI readiness, integration strategies, and cost-performance tradeoffs for small businesses entering the AI space

Software & Systems Consultant
May 2019 - June 2023 (4 years 2 months)
United States

• Developed web applications with dynamic backend logic and secure data handling
• Implemented cloud-based dashboards for analytics, reporting, and real-time monitoring
• Provided technical documentation and training for non-technical stakeholders
• Delivered user-centered, AI-enhanced design solutions for startups and clients.
• Created reusable design components and conducted heuristic evaluations.

Fiverr
User Experience Designer
December 2017 - October 2018 (11 months)
United States

During my freelance time, my hands-on approach extends to leading discovery workshops and user research sessions with clients and startups, aiming to distil their intricate challenges into simplified design objectives for both print and digital content.

My adherence to brand guidelines goes beyond mere compliance. I've taken the initiative to build a robust design system, laying emphasis on design patterns, layout, typography, and hierarchy. I've crafted essential components via Figma that have served as building blocks in the evolution of our design system.

My commitment to quality and consistency is evident in my collaborations with UX designers both domestically and internationally. Together, we strive to maintain consistent design standards across projects, ensuring a harmonious and cohesive end product that not only meets but exceeds expectations.

Education

Colorado State University Global

Master's degree, Artificial Intelligence / Machine Learning · (October 2025 - December 2026)

Johns Hopkins Whiting School of Engineering

Certificate Course, Generative AI · (January 2025 - July 2025)

Imo State University

Bachelor of Arts - BA, Graphic Design · (October 2005 - October 2009)
